### What is it?

DUO 2 is a unique premium rabbit toy – a Pleasure Air clitoral stimulator and powerful G-Spot vibrator combined to create advanced, blended orgasms.

### What sets DUO 2 apart?

More than just a reinvention of the rabbit, DUO 2 is the only toy that offers Pleasure Air clitoral stimulation and G-spot vibrations simultaneously. Womanizer's flagship dual stimulator is equipped with innovative features for the most fulfilling whole-body orgasms. Two separately controlled motors allow for versatility and custom control.

## Key Selling Points

### Pleasure Air Technology

Features the perfect balance between pulsating and massaging changes in air pressure without touching the clitoris. This ensures that the approx. 8,000 nerve endings are never over-stimulated leading to a new kind of extraordinary orgasm.

### Smart Silence

Smart Silence ensures that Pleasure Air will only turn on when the stimulation head almost touches the skin. Until then DUO 2 remains silent in standby mode for a discreet experience and to conserve battery life.

### Dual Stimulation

DUO 2 simultaneously targets the G-spot with rumbly vibrations and the clitoris with Pleasure Air, creating deeply satisfying blended orgasms. The external and internal stimulation intensity can be controlled separately, so you can find the right combination for you. Enjoy the rich mix of sensations and choose from 14 intensity levels and 10 vibration patterns. DUO 2 has the right setting for the most fulfilling, advanced blended orgasms.

### Who is it for?

DUO 2 is for the connoisseur of pleasure looking for an advanced toy. This unique rabbit vibrator is aimed at experienced explorers looking to heighten masturbation and discover new sensations – such as the blended orgasm.

## How to demo

- Begin the demo by sharing that Womanizer's revolution rabbit vibrator has had everyone raving about how easily it brings them to orgasm, thanks to the combination of Pleasure Air and G-spot vibration. DUO was a true reinvention of a long-standing sex toy classic and is now available with new features and colors.
- Turn on DUO 2 by pressing the power button for 2 seconds. Note the haptic feedback that indicates the product is on and that the LED light inside the stimulation head has turned on.
  - The LED flashes once when the intensity level changes and will flash continuously when battery is low.
  - During charging, the LED flashes until the battery is full. When fully charged, the LED will stay on.
- Show your customer that they can control the intensity of Pleasure Air and G-spot vibrations separately.
- Cycle through all 14 levels of Pleasure Air by pressing the (●) and (-) buttons – do the same for vibration.
- Illustrate how Pleasure Air Technology works by placing your palm on the stimulator head.
  - Explain how this technology is the first clitoral stimulator of its kind. The toy uses Womanizer's revolutionary Pleasure Air Technology developed to, gently and indirectly, stimulate the clitoris. It produces sucking and massaging changes in air pressure, so that orgasm can be reached.
  - Mention how some people have experienced issues with some of the similar products in this category because they are solely suction and have been too intense causing pain and even marking (like a hickey!).
- Show them that the stimulation head can be removed and share that DUO 2 comes with two different sizes (14 mm and 10 mm). The heads were developed to accommodate body diversity (covering 99 % of clitoris sizes) and sensitivity levels.

## User interface

### Magnetic charging pins

**On/Off button**  
Press for 2 seconds

**Afterglow**  
Press briefly

**Internal Vibration Control**

**Increase Intensity**  
Press (●) briefly
